A	Memorandum of Understanding Regarding the Tahoe Sierra IRWM Plan Revised January 30, 2014
---	--

Section 8: Implementation Framework

8.1 Introduction

This section documents the relationships and decision-making structure recommended for use during the continued development and implementation of the Tahoe-Sierra Region (T-S Region, Region) Integrated Regional Water Management Plan (IRWM Plan) over the next 20 years. It also sets forward a proposed framework for Plan implementation and guidelines for performance monitoring to track progress, and it offers suggested initial Plan implementation activities. This section is intended to serve as the cornerstone of actions the Region must take to continue the IRWM program into the future. The governance structure recommendations included in this section are intended to be consistent with the Integrated Regional Water Management Guidelines for Proposition 84 and Proposition 1E (Guidelines) published by the California Department of Water Resources (DWR) in November 2012. The Guidelines require that the governance structure address the following:

- Public outreach and involvement processes*
- Effective decision making
- Balanced access and opportunity for participation in the IRWM process*
- Effective communication – both internal and external to the IRWM region*
- Long term implementation of the IRWM Plan*
- Coordination with neighboring IRWM efforts and State and federal agencies*
- The collaborative process(es) used to establish plan objectives (discussed in Section 4)
- How interim changes and formal changes to the IRWM Plan will be performed
- Updating or amending the IRWM Plan*

The topics above are discussed in the sections that follow with items that are asterisked the focus of the activities discussed in Section 8.2.

8.2 Recommended Governance Structure

Once the T-S IRWM Plan has been adopted, the focus of the Regional Water Management Group (RWMG) or Partnership and stakeholders will change significantly. Some of the activities conducted during Plan development will continue, but the emphasis will shift from planning toward implementation and tracking of progress. Implementation of the T-S IRWM Plan will rely on actions taken by existing agencies and organizations within the Region. In order to implement the Plan in an open and definitive way, each Region is required to develop a

governance structure consistent with the Propositions 84 and 1E IRWM Guidelines. The guidelines state:

“The IRWM Plan must document a governance structure that ensures the IRWM Plan will be updated and implemented beyond existing State grant programs.”

The proposed governance structure was developed to reflect the discussions of the partnership and stakeholders to provide a means for the Region to maintain functionality, encourage open participation in the Plan, and help assure Plan longevity and stability.

8.2.1 Organizational Structure and Function

The following provides the proposed governance model for consideration to include in the T-S IRWM Implementation Framework section. The recommendations in this section are not binding but are intended to provide guidance to the participants.

8.2.2 Roles and Responsibilities

The stakeholders and RWMG need to work together to ensure successful plan implementation and each of the following groups will have varying roles and responsibilities:

- Tahoe-Sierra RWMG /Partnership who are also MOU Signatories
- Stakeholders or IRWM Participants
- Project Proponents
- Subcommittee

It should be noted that individuals may participate in more than one group fulfilling different roles as needed.

Individuals within the RWMG/Partnership will provide leadership for fostering cooperation, continuing coordination, tracking of Plan performance, and updating of the IRWM Plan. Subcommittees may be formed to help focus collaboration and progress on specific topics or objectives. Some of the subcommittees may be “ad hoc” and only exist for a few meetings to accomplish a specific task, while others may be long lasting with regular reporting responsibilities to the broader RWMG/Partnership.

The narrative that follows describes some of the specific roles and responsibilities of various participants involved in plan implementation. Table 8-1 that follows summarizes the overall activities of IRWM Implementation. Activities that are listed in the Guidelines are shown as “required”, while other activities such as administer website, and update content with meeting materials, and other relevant information are marked “additional”. IRWM Implementation is not intended to interfere with or supersede actions taken by local agencies to fulfill the local agencies’ authorized duties.

Table 8-1: Activities, Participants, and Roles for Implementing the Tahoe-Sierra IRWM Plan _ **TO BE DISCUSSED AT SUBCOMMITTEE CALL**

Potential Roles: Lead, Coordinate, Support,

IRWM Activities	RWMG/Part nership Role	Sub-Committee Role	Project Proponents Role	Other/No tes
1. Public outreach and involvement processes -				
a. Establish Point of Contact for IRWM Program				
b. Maintain e-mail list				both internal and external to the Region
c. Schedule and Announce meetings				both internal and external to the Region
d. Prepare agendas and content				
e. Facilitate meetings				
f. Prepare meeting summaries				
g. Administer website, and update content with meeting materials, and other relevant information				both internal and external to the Region
2. Balanced access and opportunity for participation in the IRWM process				
a. Monitor and maintain DAC and Tribal Contacts list through Notification Prior to Partnership Meetings				
3. Effective Communications External to The Region				
a. Communication External to the Region – participation in Round Table of Regions,?				See also 1
b. Coordination with neighboring IRWM efforts - Sierra Water Work Group?				See also 1

c. Coordination with State and federal agencies				
4. Long term implementation of the IRWM Plan				
a. Evaluate Plan Performance and Monitoring for Meeting Objectives				
b. Review and act on objectives/targets not accounted for in projects				
c. Gather and synthesize data related to Plan projects and report to stakeholders				
d. Manage and share-related data and information (also could be Data Management System)				See Also 1
5. Update Tahoe-Sierra IRWM Plan				
a. Review and update objectives				Formal Change
b. Solicit new or revised/integrated projects, provide project evaluation/scoring and regularly revise project and update project priorities, as needed or at a minimum of every 2 years				Interim Change
c. Revise plan content at least every 5 years				Formal change
6. Financing Plan Implementation				
a. Evaluate IRWM Plan Implementation Administration (e.g. Local Staff in-kind contributions, and/or grants, or other financial sourced)				
b. Communicate information on upcoming funding				See also 1
c. Improve project integration and select projects for inclusion in grant applications				
d. Prepare and submit grant applications	Support		Lead	

OTHER TOPICS?				
e.				
f.				
g.				
h.				

8.2.2.1 Regional Water Management Group/Partnership

The RWMG/Partnership is a group of three or more local agencies, at least two of which have statutory authority over water supply or water management. Within the Tahoe-Sierra RWMG/Partnership, South Tahoe PUD, Tahoe City PUD, North Tahoe PUD, all have statutory authority over water supply or water management fulfilling this requirement. The primary function of the RWMG/Partnership will be to implement projects contained within the Plan to achieve the approved objectives. The RWMG/Partnership will act on all matters necessary for IRWM Plan implementation.

8.2.2.2 MOU Signatories

The signatories to the MOU are the Partnership and represent a spectrum of public agencies, special districts, non-profit organizations and education institutions throughout the Region.

8.2.2.3 IRWM Participants

Tahoe-Sierra IRWM Plan participants include the Partnership and any stakeholders interested in water related issues in the Region who choose to participate in the T-S implementation activities.

8.2.2.4 Project Proponents

Agencies or organizations who are implementing projects (including feasibility studies, data collection and analysis, etc.) are project proponents of the Plan. Projects included and tracked by the T-S IRWM Plan may include projects funded (in whole or in part) by IRWM grant funds, as well as projects and programs funded independently. Project proponents will be responsible for implementing the projects contained in the T-S IRWM Plan, and, if funded by IRWM grant funds, will be required to submit project-specific monitoring information to inform progress towards achieving Plan objectives.

It is envisioned that the project proponents will have the following roles and responsibilities:

1. Provide project-specific information for the regional project database that may aid in advancing the Plan’s regional objectives.

2. Seek opportunities to integrate, where possible and practical, Plan projects in the database to most efficiently achieve the regional objectives. This process may be initiated and facilitated at stakeholder meetings, but it is expected that project proponents will further develop these opportunities outside of that forum.
3. Provide updated project-specific information for the regional project database as necessary to reflect major project milestones (e.g., CEQA completion, 100% design, construction underway, construction complete, and project completion). This particular role is a critical element of Plan implementation and is in the best interest of the project proponents, since having updated information available will help projects when applying for financial assistance. This can also include adding or removing projects from the database and will occur at least every two-years.
4. Identify a point person for each project who will provide, in a timely manner, requested information for projects for inclusion in a grant application.
5. Identify a point person for each project who will provide, in a timely manner, to the grantee, requested information for projects selected for funding through a funding agency.
6. Comply with grant requirements, as identified by the funding agency, to qualify for grant funding.

8.2.2.5 Sub-Committee

The Sub-Committee; should it be decided one is needed, is a smaller group of MOU signatories who provide leadership and focus on a more detailed project/program level toward coordination and cooperation on behalf of the RWMG/Partnership. Any member of the RWMG/Partnership is welcome to join the sub-committee. The primary roles of the Sub-Committee could include:

- Conduct meetings to provide opportunities for discussion regarding Plan implementation and future updates or revisions to the T-S IRWM Plan.
- Improve collaboration efforts to support development of integrated, regionally focused projects.
- Foster continued communication among stakeholders within the Region that support implementation of the T-S IRWM Plan.
- Assist Project Proponents in pursuit of grant funds to help implement projects included in the IRWM Plan.
- Promote, track and report on progress toward meeting the Plan objectives.
- Recommend process for updating or amending the T-S IRWM Plan.

8.2.3 Access and Opportunity for Participation

One of the most important aspects of Plan implementation is processes to ensure that the public and interested stakeholders continue to be involved. This will be accomplished through multiple avenues of communication and engagement among the RWMG/Partnership and IRWM participants, including, at minimum, the following:

- The RWMG/Partnership will conduct outreach, create content and facilitate at annual (minimum frequency) Partnership meetings. In addition, the RWMG/Partnership will support any subcommittees that may be formed on separate technical meetings. During the meetings, all MOU signatories are invited to participate as equals in the interaction to reach consensus on the implementation of the Plan.
- The RWMG/Partnership will continue to foster dialog with Tribes and representatives of the Disadvantaged Communities (DAC) and environmental justice communities within the Region as needed to support meeting the objectives of the Plan. Extra contacts will be made prior to meetings to notify Tribal and DAC representatives of topics of interest.

The RWMG/Partnership will e-mail and will post meeting materials and other relevant information to the project website and invite review and comment from any interested person or organization

8.2.3.1 Internal and External Communication

As summarized in Table 8-1, multiple avenues of internal and external communication will be facilitated by the RWMG/Partnership including:

- Prepare communication materials for distribution, posting on the project website, and for use in meetings with governing boards and other interested parties.
- Conduct meetings at least annually that are announced and open to any stakeholder.
- Ensure that individuals are assigned to meet and coordinate with neighboring IRWM planning efforts, other local, state, and federal agencies as they relate to accomplishing the objectives in the T-S IRWM Plan.
- Ensure that engagement occurs with neighboring IRWM efforts and other state and federal agencies that have interests or could impact meeting the objectives of the Plan. The RWMG/Partnership will continue to communicate with DWR regional representatives.

8.2.3.2 Public Involvement Processes

All organizations and individuals with an interest in improving water management in the Region are invited to participate in Plan implementation. The RWMG/Partnership recognizes that a committed public outreach and notification process is a necessary task to ensure the public is aware that there are multiple opportunities to become involved in the program. Disadvantaged Communities and Tribes will continue to be an important aspect of outreach in the Region. The public involvement processes to be completed by the RWMG/Partnership include:

- Coordinate Partnership Input meetings at least once per year to discuss relevant topics of progress on implementation of the T-S IRWM Plan. The Partnership may convene additional meetings as desired to support fulfilling the objectives of the Plan.
- Maintain and update content to the T-S IRWM Plan website.
- Maintain a contact e-mail and phone number for people to send comments or ask questions about the T-S IRWM Plan.
- Maintain the T-S stakeholder e-mail list and send updates and meeting invitations as appropriate.

8.2.4 Decision Making

Decisions during implementation will continue to be made using consensus based agreement, as during Plan Development. If for some reason broad agreement cannot be reached related to specific items within a reasonable amount of time and effort, the Partnership will discuss such items(s) and then decide by majority vote how to proceed.

8.3 Plan Financing

Implementation of an IRWM Plan is an enormous undertaking and requires the financial contributions and attention of local, state, and federal agencies to ensure success. Financing of this T-S IRWM Plan involves two distinct tracks: funding of IRWM Plan administration through local in-kind staff time and and coordination and funding of project implementation. This section highlights the anticipated funding needs for both tracks, identifies potential funding sources, and documents some of the activities that the RWMG/Partnership and others will employ to secure additional funding.

8.3.1 Funding Needs

8.3.1.1 Implementation Administration Funding

Development of the IRWM Plan was funded by the RWMG/Partnership and an IRWM Planning grant from the DWR. However, these funds cannot be spent on implementation activities, so one of the first steps to implement the IRWM Plan is to establish a mechanism to support implementation coordination. These could include activities undertaken by the RWMG/Partnership to plan for and conduct stakeholder input meetings, track plan implementation (including progress towards completing plan objectives and projects), and conduct ongoing public outreach and engagement as described in the governance sections.

Specific funding needs have not yet been confirmed, and so it is anticipated that the following steps will be taken to establish a funding mechanism for this task:

- The RWMG/Partnership will establish estimate of effort to fulfill the activities described in Table 8-1.
- Members of the RWMG/Partnership (and potentially other agencies/organizations within the Region) may provide funds or in-kind services to fulfill the roles of the RWMG and administrative support.

- The RWMG/Partnership may seek additional local and/or other funding to fulfill the activities required for Plan implementation.

8.3.1.2 Project Implementation Funding

As of March 2014, sixty projects are included in the IRWM Plan. All of the projects provided funding information, with a total estimated funding need of \$94.5million. Of the sixty projects, several are projects currently at the early planning or feasibility study stage, which is an indicator that the overall funding needs will likely increase as these projects progress and are developed into implementable projects, programs, or actions, and as other projects are added to the IRWM Plan. Table 8-2 summarizes financing needs and the availability of capital and operations and maintenance funding sources based on information provided by project proponents. The asterisked projects were submitted for an IRWM Round 2 Implementation grant in March 2013. It is recommended that this table be updated at a minimum every two years or as needed.

Table 8-2: Project Financing Summary (PER GUIDELINES TABLE 5 -TO BE COMPLETED FOLLOWING SUBCOMMITTEE DISCUSSION)

Project No.	Lead Agency/Organization	Project Title	Approximate Cost	Funding Source and % of Total Cost	Funding Certainty/Longevity
<hr/>					
<hr/>					

8.3.2 Potential Funding Sources

8.3.2.1 Stakeholder Funding

Funding sources are rarely assured far in advance of project implementation. Additionally, many agencies have encountered challenges to securing project funding as grant programs have become more competitive and agency budgets have become significantly constrained during the recent economic downturn. It is understood that funding is required to implement (that is, to construct) projects, as well as operate and maintain the project after initial construction is completed. In most cases, it will be the responsibility of the project proponents to ensure that initial construction and operations and maintenance funding needs are met for specific projects. Despite limited funds, most agencies do have a variety of funding tools available including:

- Ratepayers,
- Operating funds,
- Water enterprise funds,
- Special taxes, assessments, and fees,
- State or federal grants and loans,
- Private loans, and
- Local bonds.

8.3.2.2 Grants and Other Sources

The RWMG/Partnership will research, identify and pursue grant funds that could help implement the projects and meet the objectives included in the T-S IRWM Plan. The RWMG/Partnership will not serve as a fiscal agent for grant funds, but rather will identify a willing agency or organization with the appropriate authority and financial management capacity to serve as a fiscal agent on behalf of the Region, as necessary, for each specific grant opportunity that is pursued. Some grant programs may require a single grantee for a Region while others can be applied for by individual member agencies.

The fiscal agent(s) may distribute grant funds to other project proponents within the Region according to the specific terms of the grant program that provides funds. The project proponents whom receive grant funds will be responsible to complete their project(s) as described in the relevant grant application and/or grant agreement. The fiscal agent will not be responsible to fund or complete projects for other project proponents outside of the specific commitments made in a particular grant agreement.

The RWMG/Partnership will track the amount of grant funds brought into the Region to support implementation of the IRWM Plan and the specific projects being funded (or partially funded) with grant funds. The RWMG/Partnership will include this information in their annual report of Plan performance.

8.4 Plan Performance and Monitoring

Another important element of successful Plan implementation is a well-developed approach to performance and monitoring. This section describes such an approach, including monitoring, adjustments, and data sharing in order to meet the 2012 IRWM Guidelines. The key elements of plan performance and monitoring involve tracking of project implementation and progress towards achieving objectives and the individual measurable planning targets (MPTs). This tracking will be monitored **in a Data Management System** described in the following section and will provide key information to inform the RWMG/Partnership and stakeholders as to whether the Plan is being implemented as intended, or whether updates or other changes are needed to keep the Plan on track.

The tracking and monitoring of plan performance does not replace required regulatory reporting by specific agencies within the Region. Plan performance tracking is being done to monitor progress on Plan implementation and provide information that can be useful for continuing implementation of, updating or amending the Plan.

8.4.1 Project-Focused Performance Monitoring

Project implementation will be tracked as part of the IRWM Plan Implementation activities included in the topic area: Update Tahoe – Sierra IRWM Plan and Manage and Share Related Data and Information. It is expected that project implementation tracking will include:

- Every two-year (minimum) call for new/revised projects.
- Update of status of the existing project list including project archival following completion of projects every two-years.

- Monitoring of in-progress project performance including project status, data results, budget and schedule.
- Consideration of opportunities to integrate or enhance existing projects.

Information about projects can be maintained in an excel spreadsheet or on the Data Management System described further in Section 8.4.2. It is anticipated that the RWMG/Partnership will have primary responsibility for project focused monitoring and will periodically request current project status information from proponents.

Table 8-3 outlines several considerations for monitoring efforts as articulated in the Proposition 84/1E guidelines (required for Proposition 84/1E grant-funded projects and recommended for all other projects in the Plan) for purposes of this Plan:

Table 8-3: Project Specific Monitoring Plans

Category	Description
Responsibility for developing project specific monitoring plans and monitoring activities	Project proponent responsibilities include development of project-specific monitoring plans and monitoring of project performance after implementation. Project proponents must report this information to the RWMG/Partnership and to any lead agency responsible for grant or loan funding contributions.
Stage of project development when a project-specific monitoring plan will be prepared	Project-specific monitoring plans will be developed by the project proponent before the start of project implementation.
Typical project specific monitoring plan requirements	Monitoring plans will include delineation of the following components: <ul style="list-style-type: none"> ▪ Description of what will be monitored for each project, ▪ Methods for monitoring problems that occur during project implementation and their correction, ▪ Monitoring location(s), ▪ Monitoring frequency, ▪ Monitoring protocols, procedures, and responsibilities, ▪ Reporting of data collected to the data management system (DMS) described in Section 8.4.2 for sharing with project stakeholders as well as to statewide databases, and ▪ Procedures and funding assurances to document that the monitoring will take place as intended during the entire monitoring period.

Lessons learned will be applied to future project implementation by evaluating the extent to which the Plan objectives and targets are accomplished, and reviewing and refining the types of projects or targets themselves based on the various experiences. For example, technical information and data collected will contribute to a greater body of understanding about certain challenges faced by the Region. Likewise, financial performance and reporting experiences will help inform more efficient ways of planning and implementing important projects. These experiences will be shared through the (at minimum annual) interactions with the RWMG/Partnership and stakeholders, and through project reporting mechanisms.

8.4.2 Objectives Focused Performance Monitoring

The tracking of Plan Objectives WQ1 – IWM6 and the associated measurable planning targets (MPT) will require more effort and coordination than tracking of IRWM Plan projects. The Objectives Tracking table found in Appendix F (TO BE DEVELOPED) was created in Excel and focuses on individual MPTs. The table identifies the projects that can contribute to meeting the MPT, and where appropriate, identifies specific activities or projects that may be needed to achieve the MPTs. The table is sorted by MPT. The activities and dates are suggested and can and should be periodically reviewed and updated by the RWMG/Partnership. The data associated with this table could also be maintained in the Data Management System.

8.4.3 Data Management- FOR DISCUSSION WITH SUB-COMMITTEE

The RWMG/Partnership has the opportunity to develop a grant-funded Data Management System (DMS) to help retain, organize and process key plan performance and monitoring data. The data management system linkage and tracking of information will feed into the Region's understanding of the success of Plan implementation, and whether adjustments to objectives, projects, or strategies may be needed in the future

As data are collected, whether linked to implementation grant programs or other funding mechanisms, there are typically reporting requirements. Many water resources linked efforts are also attached to mandatory regulatory reporting requirements to statewide databases. To make data from the Region accessible and compatible with State databases (such as SWAMP, Geotracker, GAMA, CEDEN, the California Water Data Library and many others), the RWMG will require implementation projects clearly delineate the nature of the data being collected (parameters, units), the timeframe associated with the data, and the location associated with the data. The T-S DMS is not intended to supersede or duplicate the statewide data collection efforts, but instead work together with the databases as resources to draw important information.

8.4.3.1 Example Data Management System FOR SUB-COMMITTEE DISCUSSION

The DMS relies on a combination of systems such as GIS, spreadsheets, and databases to track important plan information. The DMS is a hybrid solution and provides a user friendly ESRI-software based GIS front-end interface that is supported by databases and spreadsheets for specific data. The DMS is located at (URL to be inserted) and includes the following features:

NOTE TO SUB-COMMITTEE- AN EXAMPLE DMS IS AT:

<http://aims3.kennedyjenks.com/ts-irwm/>

- Topographic Base map with layers for water agency boundaries, watershed boundaries with rivers and lakes, DAC areas, Tribal lands (partial), 303d listed streams and water bodies, watersheds, General Plan and DWR Land Use classifications
- Production of custom maps with available information
- Project Locations
- IRWM Projects and project information forms
- Flood hazard areas

- Hydrologic and other types of models
- Document library and document search tool
- Reference documents
- Plan sections when complete

FUTURE DMS

- Water quality data for surface and groundwater to either be hosted directly within or live-linked to other web sources
- Water quantity data through live links with gauging stations, meter data, and diversion data
- Water rights data
- Project Tracking Database/Spreadsheet. A future DMS phase could include an on-line database which will require an administrator to manage and add the projects. The spreadsheet will track information including:
 - Project name
 - Project proponent
 - Project location
 - Short description
 - Estimated cost and funding sources (such as Proposition 84/1E funded)
 - Project schedule and current status
 - Type and location of project specific monitoring information
 - Objectives and MPTs the project will contribute to
- Objectives Tracking spreadsheet or database (Note: the spreadsheet will be developed as described in Section 8.4.2 and will be included in **Appendix F** to this Plan)

8.4.3.2 Potential Long-Term Data Management Options

At present, questions remain regarding the future update, maintenance, hosting, and troubleshooting of the DMS. There are also opportunities to further enhance the DMS in the future that should be considered.

OPTIONS INCLUDE:

- i. -Partnerships with neighboring IRWM with DMS Hardware and Software – for potential hosting
- ii. -Partnerships with Sierra Water Work Group (SWWG) for maintenance
- iii. -Partnerships with other Sierra IRWM Groups to develop DMS data for sharing
 - a. Upper Feather IRWM

- b. Tuolumne-Stanislaus IRWM
- c. Cosumnes, American, Bear and Yuba IRWM
- d. Southern Sierra IRWM
- e. Inyo-Mono IRWM
- f. Yosemite-Mariposa IRWM
- g. Mokelumne/Amador/Calaveras (MAC) IRWM
- h. Upper Pit River Watershed IRWM
- i. Madera IRWM
- j. Yuba County IRWM
- k. Lahontan Basins IRWM

SUGGESTED RECOMMENDATION: K/J to evaluate and i. and ii and provide a revised proposal for initial DMS development and near-term maintenance incorporating partnership with SWWG and up to 2 other IRWM groups, if interest is there, with a summary of DMS implemented by the other 11 Sierra IRWM. Also suggest, a DMS committee of up to 2 Tahoe-Sierra members for consultation.

8.5 Suggested Initial Steps for Plan Implementation

In order to bring focus to the specific implementation action recommendations described in Table 8-1, the following near-term activities and schedules are suggested as shown in Table 8-4.

Table 8-4: IRWM Plan Near-Term Implementation Activities and Schedule

Activity/Action	Lead Entity	Planned Schedule
1. Establish an annual operating mechanism for implementation support and manage expenditures of administration support activities	RWMG	By September 2014
2. Convene Plan Implementation Meetings to develop proposed meeting schedule for 2015 and 2016. It is suggested that at minimum one plan implementation meeting be held per year.	RWMG	Schedule 2015 and 2016 meetings
3. Develop, transition, maintain and complete DMS	RWMG (OTHER PARTNERS?)	By December 2014
4. Issue a Call for Projects to add, delete, or integrate existing projects and project status updates	RWMG	By February 2016
5. Prepare for applying for Round 3 DWR Implementation Grant funds and other grant funding opportunities	RWMG	By November 2014
6. Coordinate with neighboring IRWM regions and local, state and federal agencies	RWMG	On-going - annually

8.6 Plan Updates and Changes

8.6.1 Making Changes to the IRWM Plan

The RWMG/Partnership will review the T-S IRWM Plan at least once every five years to determine if the content of the Plan needs to be changed in a significant way other than the periodic updates or amendments of the objectives and projects as described below. If significant changes are needed, the RWMG/Partnership will lead the process for revising the Plan. Once substantial revisions are made, the RWMG/Partnership will request that RWMG members and project proponents adopt the revised Plan.

8.6.2 Updating and Amending the IRWM Plan

The RWMG/Partnership will invite stakeholders and project proponents at least once every two-years to submit additional projects for consideration to be included in the IRWM Plan or provide updates to projects already included in the IRWM Plan. The RWMG/Partnership will publicize the opportunity and process to submit new projects (or updates) for consideration. The Partnership will present and discuss the potential additions/revisions to the project list within the T-S IRWM Plan in one or more Stakeholder input meetings, and recommend them for inclusion in the Plan. Following acceptance of the addition/revisions to the project list, adoption of the project list may be required on a case by case basis by individual project proponents to meet requirements of the IRWM Guidelines or individual proposal solicitation packages.

Other changes to the Plan or Plan objectives will be decided as described above and published as Plan Amendments. The RWMG will request that members of the RWMG and project

proponents adopt the Plan Amendments as an addendum to the previously adopted T-S IRWM Plan.
